

Orange Heart DONATES TECH

In an effort to foster technological advancement, the CGA Orange Heart Initiative recently donated tablets to two schools. By Sive Silo

Justin Chadwick and Jacomien de Klerk, after handing out the tablets

Sive Silo with the happy recipients

The two schools that received donated tablets from the CGA Orange Heart Initiative are participants in the Citrus Academy Citrus Secondary Programme. This generous gesture aims to provide students with the necessary tools to excel while learning and participating in this programme.

The Citrus Secondary Programme targets high school learners who aim to achieve a plant production qualification by the time they leave school. It's implemented in high schools in citrus growing regions across the country.

Winterberg Agricultural High School in Fort Beaufort, Eastern Cape, is implementing the programme as part of their Agricultural Management Practices curriculum. Each of the 21 Grade 10 learners currently enrolled in the programme, received a tablet.

Clydesdale Senior Secondary School in Umzimkhulu, KwaZulu-Natal was the recipient of 20 tablets. The school currently has 30 learners enrolled for the programme and will be implementing it as an extracurricular activity.

The partnership between Orange Heart Initiative and the Citrus Secondary Programme highlights the importance of collaboration in driving positive change within the skills development sector.

Orange Heart

We back you with
CROP PROTECTION

Alion® is a herbicide registered on apples, citrus, pears, grapes, macadamia, pecans and stonefruit.
