Keeping all RBX Group Stakeholders Informed

Note from the MD

Having just completed our Financial Year End at the end of March we have had our budget for the next year approved by our board of directors.

Although still to be audited last year was a great year for the RBX group but the tough budget reminds us of how much still needs to be done. Cheers Rob

Strength doesn't come from what you can do. It comes from overcoming the things you once thought you couldn't.

Building HR Capacity

As from 01 March 2019, the payroll function at River Bioscience was brought in-house for the first time. This complex process took months of planning, training and testing from all involved. The smooth transition and timely completion of this process speaks to our staff's commitment to taking on new challenges and passing with flying colours. Having the payroll function in-house means that we can catch errors quickly, customize the system to suite our needs, ensure data security and integrate metrics with our other business systems.

The in-house payroll system is yet another building block in aligning with the overall and, more specifically, the human resources vision and strategy for the River Bioscience and X-SIT Group.

RBX Group Birthdays in May : Arnando Baron;
