## 1. Introduction to Integrated Pest Management

- Introduction
- Pest Categories
- Integrated Pest Management
- Pest Monitoring
  - Trapping
  - Scouting
- Pest Control Methods
  - Biological Control
  - Cultural Control
  - Chemical Control
- Pest Management Planning
- Conclusion

## 2. Citrus Pest Monitoring

- Introduction
- Pest Scouts
- Scouting Tools
- Data Trees
- Inspection Points
- Scouting Procedures
  - Sweep Surveys
  - Timing
  - Scouting for Multiple Pests
- Citrus Pests
  - Thrips
  - Red Scale
  - Mealybug
  - False Codling Moth
  - Fruit Fly
  - Oriental Fruit Fly
  - Bollworm
  - Budmite
  - Red Mite
  - Flat Mite
  - Other Mites
  - Citrus Psylla
  - Other Scales
  - Mussel Scale
  - Waxy Scale
  - Soft Scales
  - Australian Bug
  - Aphids
  - Leafhoppers
  - Citrus Butterfly
  - Citrus Flower Moth
  - Leafroller
  - Ants

Woolly Whitefly  
Other Citrus Pests  
Conclusion

### **3. Preharvest Blemish Analysis**

Introduction  
Purpose of Analysis  
Fruit Collection Procedures  
Fruit Blemishes  
    Blemish Example: Thrips  
    Blemish Example: Budmite  
Blemish Analysis Records

### **4. Interpreting Monitoring Results**

Introduction  
Tools for Interpretation  
Preventative vs. Corrective Control  
Red Scale  
    Pre-Harvest Blemish Analysis Data  
    Trapping Data  
    Scouting and Microscopic Evaluations  
    Corrective Treatments

Mealybug

    Preventative Treatments  
    Scouting Data  
    Corrective Treatments  
        Life-Stages  
        Ant Control  
        Mealybug Species

Thrips

    Preventative Treatments  
    Corrective Treatments

False Codling Moth

    Trapping Data  
    Fruit Infestation Data  
    Egg Parasitism Data

Fruit Fly

    Trapping

Other Citrus Pests

    Aphids  
    Australian Bug  
    Bollworm  
    Bud Mite  
    Flat Mite  
    Leafhoppers  
    Planthoppers  
    Snails and Slugs  
    Soft Scales  
    Waxy Scales  
    Red Mite

Conclusion
